Stamps for Licensed Professionals

We can supply a wide array of stamps and seals for use in the professional disciplines. Professional engineers, architects, land surveyors and others. All stamps and seals are produced to conform to individual state requirements... *we guarantee it.* Variations on the types of tools that can be used differ from state to state. Listed below are the types of tools we can supply, everything from the basic hand stamp to an electronic file. Be sure to check what your state allows before you order.

☑ Flash Technology Pre-Inked Stamps

Premium quality flash pre-inked stamps can make thousands of impressions (on paper) without re-inking. *Just Press and Print!* No separate stamp pad needed... the ink is in the stamp. Fully re-inkable. Available in five (5) ink colors: Black, Red, Blue, Green or Purple.

☑ Ideal® Self-Inking Stamps

The Ideal® Self-Inking Stamp does not require a separate stamp pad. The stamp pad is in the stamp. Good for thousands of impressions. The pad can be re-inked or replaced very easily. Available in five (5) ink colors: Black, Red, Blue, Green or Purple.

Professional Engineer
Architect
Land Surveyor
Wetlands Scientist
Geologist
Landscape Architect
Forester
Soil Scientist
Subsurface Engineer
Licensed Appraiser
... and more!

☑ Conventional Hand Stamp

The conventional hand stamp requires a separate stamp pad. Printing dies compatible with special fast drying inks for use on plastics, Mylar etc. can be provided. *Please specify*.

☑ Metal Embossing Seals

Your embossed seal guarantees permanent tamper-proof protection of both your seal and the copy over which it is placed. Our most popular embossing seal (shown to the left) is the Ideal® Deluxe Series Model MD. This precision pocket seal embosses your information crisply on the document. A heavy duty desk style embossing seal is also available.

Note: Some designs do not lend themselves for use as an effective embossing seal. Metal embossing seals are for use on paper only.

☑ Electronic Seal File (jpg format)

In addition to stamps and seals we can provide electronic seal files in the jpg format. *Make sure that your state allows the use of this type of seal imprint.*
