Band Stamps - Line Daters

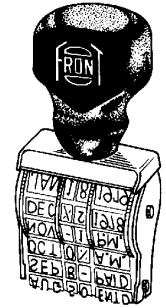

Used in offices, factories, shops, stores and homes, line daters print month, day and year as shown in the sample impressions.

Line daters are available in hand (regular) and self-inking styles. Hand style, used with a separate stamp pad, is the economical answer to a small volume of date stamping. Choose self-inking style for speed and convenience in handling larger volumes of date stamping.

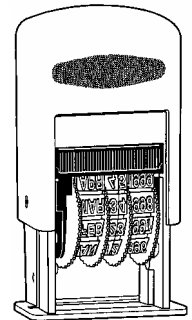

All line daters have 4 bands made of strong vulcanized rubber. Knurled wheels easily turn bands to desired date.

All stock year bands include or begin with the current year unless ordered as special bands.

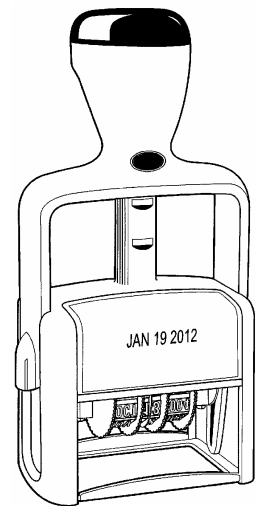

Dater bands may be combined with figure, letter or special (custom) bands to make up special purpose daters to meet your specific requirements.
