

Granite State Stamps, Inc.

Marking, Identification, Recognition & Signage Products

PO Box 5252 • Manchester NH • 03108

To obtain the best possible results with signature, logo and special artwork stamps, please follow these steps:

SIGNATURES:

- Please supply several signatures in black ink on white UNLINED paper as close as possible to the size you are looking for.
- Please leave some space between each signature.
- Signatures are best if written with black roller ball type or fine felt tip pen. A ball point pen is not recommended as it may leave skips in your strokes while signing and the finished signature stamp may not be to your liking.
- For self-inking (Trodat®) or pre-inked stamps (Xstamps® or Maxlight®), be sure to use the size guidelines provided with each.

LOGO/ARTWORK:

- Please supply crisp clean black-on-white artwork. Even if the original logo and/or artwork are in color, please supply in black and white.
- We can reduce or enlarge clean artwork to meet your size requirements, but please make sure your artwork is clean. We are unable to clean-up images that are just too poor to reproduce photographically.
- The fastest and easiest way to submit your files is by email. We accept .eps, .tif, .bmp, .pdf, .ai and .wmf. You can also mail your signature/logo/artwork to us if you prefer. Faxing is **NOT** recommended as it can distort the image.

We can do some simple cleanup to your submitted signature/artwork/logo. More extensive revisions may incur additional costs. Please submit the best possible signature/artwork/logo you have so we can give you the best possible impression!
